

## SRR BBV Audit

### Definitions

The response is measured by the concentration of antibody measured in serum one to four months after the end of the course of immunisation to Hepatitis B.

**Full response to Hepatitis B vaccination:** Hepatitis B Ab titre  $\geq$  100 IU/L

**Partial response to Hepatitis B vaccination:** Hepatitis B Ab titre  $\geq$  10 IU/L and  $<$  100 IU/L

**No response to Hepatitis B Vaccination:** Hepatitis B Ab titre  $<$ 10 IU/L
